

Dear Hiring Manager,

My name is Iradukunda Mahoro Sandra. I go to school at Liquidnet Family High School in Agahozo Shalom Youth Village. I am studying Mathematics, Computer Science and Economics. I want to apply for the Isomo Internship in Digital Art About videography and photography as I have skills in media production.

Honestly, I like sharing skills especially with young people like me, because I believe that it is never a success until we all succeed. Every Friday and Saturday I teach girls how to make media productions. I teach them how to take pictures and make videos. I also teach them how to edit videos, pictures and how to use a tool called a gimbal to avoid shaking. I teach them how to do live streaming using a software called OBS. This helps them get better at speaking English because I teach my classes in English too. I want to help them feel more sure of themselves and I teach them not only to capture the moment but also to tell a story through their work which can change the community at large.

When I teach I break hard things down into simple and smaller. This helps my students learn faster and get content clear. My goal is not just to teach skills. I want to help young girls use the media to say what they think and make a difference in their communities as they build their confidence. Before class we talk about media in general and how to use it effectively in the 10 minutes we have named "Media in sociality" This is a time for us to talk about what's on our minds, share our projects, celebrate one another's achievement and see the media outside how it is at large, and plan the project we are going to do to change the lives of people.

I have gotten good at taking pictures and making videos and editing them. I have also gotten best at live streaming and telling stories. I use these skills to make things that teach people and inspire them. I think the media is a tool. It can change the way people think and help make things better because I believe that is not yet success until we all succeed.

I am also part of Isomo Circles. This helps me get better at speaking English and learning things faster so that I can teach media skills in English. My students learn the words we use in the media in English.

My life has taught me to be responsible and strong. My mother was very strong. She taught me the importance of being on time and working hard. She did this even when she was not feeling well. I have to help my family and keep learning. This has taught me to work and believe in the power of education.

I think I can bring a lot of energy and patience to Isomo. I am creative. I have a reason for doing things. I want to help students get skills and feel more confident. I want to help them make a difference in the world. I love Isomo. I want to be a part of it.

Thank you for your time. I would be happy to join Isomo and help students become more powerful.

Sincerely

Iradukunda Mahoro Sandra
